

## Part II. The Electronic-Acoustic Con

### Chapter 2. The New Torture-Murder Surveillance of Amerika

An introduction to the effects of "ACOUSTICS" on the human body. By Joe Martin

Aug. 18, 2006 Ramsey Update Below

Lately the mainstream television media has addressed the issue of illegal surveillance possibly performed on and against American citizens within the borders of the United States, and has mentioned wiretapping, and reading of e-mails, but no real mention of the heavy duty "ACOUSTICS". "Acoustics" refers to the more sophisticated type of surveillance devices which can actually be used as WEAPONS when deployed certain ways. The "I.R. laser" can be aimed at an area or focused on a window pane or other part of a building or vehicle and can pick up sounds and conversations which can be transferred through electronic circuitry and amplified to produce recognizable conversations and voices, etc.. Whether this device is aimed directly at a person within the building or vehicle, and how close the device is aimed from may determine how much ear ringing or skull pressure and general aggravation the target-victim may suffer. Also any ability of the operator to alter the modulation of these devices may have an additional effect on the target-victim. Recently there were incidents on mainstream television news in the past few years of aircraft pilots getting lasers aimed into their cockpits, and the reports of persons going blind or partially blind continues as well, though much of the blindness injury reports escapes the media.

In the event the surveillance lasers are used in the attacks on airliner pilots within their cockpits and the unexplained blindness injuries, do you think government agents would actually admit they have abused these surveillance weapon-devices? If one could show a jury in a courtroom the harm these devices are capable of doing to a human body up close, would it not stand for reason that they are harmful at any distance to the body, especially sensitive organs ???? I doubt seriously if any law enforcement or military person would want to get in front of one of these devices and stay there for as long as they have aimed them at surveillance target-victims. Why?? Surely the personnel who use these lasers have been trained and briefed on the possible effects of direct exposure. There are other forms of these surveillance weapon devices which use sonar type technology, microwave, etc., etc., and most use radiation. Whether one aims non-nuclear, electromagnetic radiation at a person, or nuclear gamma X-ray at someone the effects on a long term overall basis to the human body will most always result in some debilitation like cancer or anemia, or chronic fatigue, or possibly even a condition of inflammation of blood vessels which can also result in death.

Regardless of what kind of radiation one cares to mention, if it is applied to the human body the results can be catastrophic if the radiation is re-applied over and over again on a regular basis. How does this relate to the today-topic of surveillance? Once again, if surveillance weapon-devices depend on emitting radiation aimed at target persons to hear the information then the target persons are receiving doses of radiation and we can say the device operators are "radiating" the target victim. Enough repeated exposure sessions and the target victim person may begin to feel bad. Let's look at an early form of one of these devices which was used against an American embassy's personnel later, and for now, let's concentrate on the significance of how the Patriot Act allows abuses of these surveillance weapons on individuals domestically, that is, within the United States.

Under normal circumstances if the United States was not operating under the Emergency War Powers Act and other emergency laws it would require a warrant be issued by a court of law in order to wiretap or invade one's space with a microwave listening or infra red laser device and that would require a show of cause to a judge as in a "show cause" order. At least some form of rudimentary evidence of possible terrorism or dangerous activity to provide "probable cause" for such investigation would need to be produced against the target person to be spied on before authorities could proceed with the sophisticated radiation producing weapon-devices, and the main point of all this is.....THIS WOULD LEAVE A LEGAL RECORD OF WHEN, AND, CONSEQUENTLY, HOW MANY TIMES THE TARGETED SUBJECT WAS RADIATED !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! \_WITHOUT THIS RECORD A PERSON CAN BE RELATIVELY BURNED UP WITH THESE WEAPONS, HAVING NO WAY TO ACCOMPLISH DISCOVERY AND FORM A LAWSUIT OR COUNTER SUIT AGAINST THIS BRUTAL SPACE-AGE ABUSE!!!!!! According to what I've seen the Patriot Act forbids persons knowing of certain types of investigations from telling the target person he or she is being investigated, and applies even if the target is a relative. Do you see what a perfect setup has been arranged for completely blindsiding, victimizing, and destroying a target-victim by various illegal programs of discrimination by authorities in the United States? Don't forget the F.B.I. Cointelpro program which may be called something else these days. Remember how the late actress, Jean Seberg, was mentally tortured by the false, planted newspaper rumors and had a miscarriage? She was later found "suicided", dead for about 11 days, I think.

With no legal recourse, no legal remedy, no redress of grievance, the present day American public is literally falling apart. In California one tortured man ran out of his house using his baby daughter as a human shield as he charged the police, allegedly firing at them with a gun, and he and daughter were gunned down and killed. But nowhere did any one I know hear any news reports of whether acoustics were used on him and his family. This man may have been driven mad by acoustics. The press won't say.

As far back as 1953 and probably even before then the Soviet Union was experimenting with radio frequencies and how they can alter human behavior. That form of study has without a doubt been honed into a more tempered weapon by now, and isn't it possible that a dictator who wants to change a citizen's mind over an event, say for example, the John F. Kennedy assassination and cover up, might indeed attempt to use a microwave type radiation weapon on such a citizen in order to get his or her mind "right"? In fact, an author and private investigator states in his book, "The Professional Paranoid", that he began to receive surveillance after being shown a document which linked people associated with the assassination of President John Kennedy, to the Watergate scandal. (1) He lists "Zapato Off-Shore Oil Co.", and "Zapato Petroleum Corp.", both as C.I.A. proprietaries which are George Bush ( I think George H. W. Bush) front companies. (2.) Other sources list them as "Zapata" ending with an "a", instead of an "o". >( Bush-Torture) Perhaps those who don't buy the phony Warren Commission Report just need a big dose of mind control, super duper microwave surveillance radiation, and, gee, without the need of a warrant issued by a judge who knows his or her bill of rights, such a skeptic can, without a doubt, be re-surveilled (radiated and treated) again and again.

Microwave Surveillance is Mind Control. Microwave mind control hides government corruption as it destroys the target victims. Target victims are citizens who are a liability to the crime families and syndicates who run and control the United States. Perhaps a good example of today's type of target victim may be someone who opposes illegal immigration, or perhaps a complete church congregation or church group or a whole family may end up on one of these phony "watch lists" and suffer the irradiation of some of the "surveillance" weapon-devices because they speak out on the phony, contrived, war in Iraq which is becoming labeled more and more as an "Iraqnam", or "Iraq-Nam". See my article, "C-Span Panel Indicates Government Lying About Surveillance-Acoustics", for more on church groups irradiated by government officers. The HOLOCAUST has now reached America and the new type of torture-murder by space-age weapons is currently being inflicted upon millions of innocent American men, women, and children. What are you prepared to do?

**Update: Aug. 18, 2006 Now that an alleged pedophile suspect was arrested for the murder of JonBenet Ramsey I'd like for you to stop now and consider how much microwave and/or infra-red laser surveillance or other "acoustics" were probably focused on the late Patsy Ramsey, mother of JonBenet, by U.S. law enforcement ( a "growth industry") in an ongoing effort to pin the murder rap on her. Yes, as is the case with many "surveillance" targetvictims, she contracted cancer again and suffered an untimely death. I believe and have the right to state and publish that the U.S. various law enforcement agencies undergo policy-agenda conflicts which cause them to attempt to frame certain persons for crimes which were committed by government agents, and such frame-ups are assisted by some news media sources and companies.
